

## Project: Helpdesks

Helpdesks is a Wordpress website, using a base knowledgepress template, with customized view and elements, with added structured data to improve SERP.

### Key points:

- Built with Wordpress.
- Created a setup that allowed generating helpdesks in a rapid speed.
- Structured data for FAQ items, which improved the search visibility of the clients.
- Automated updates and backups for each helpdesk, both a local and remote.
